

HOW TEXTRON AVIATION SUPPORTS OWNERS THROUGH WORLD-CLASS FLIGHT & MAINTENANCE TRAINING

When you purchase a Textron Aviation aircraft, you're not only acquiring a new aircraft—you're gaining access to one of the most comprehensive training ecosystems in the industry. For more than four decades, Textron Aviation has partnered with FlightSafety International® to ensure pilots, technicians and flight departments receive the highest levels of instruction, peace of mind and support.

A DEDICATED TRAINING PARTNERSHIP

Textron Aviation joined FlightSafety International® to form FlightSafety Textron Aviation Training (FSTAT). This joint venture delivers training tailored to Cessna®, Beechcraft® and Hawker® aircraft operators.

Each new aircraft purchase includes Pilot Initial and Maintenance Initial training seats:

- Citation: 2 Pilot, 2 Maintenance
- King Air: 2 Pilot, 1 Maintenance
- SkyCourier: 2 Pilot, 1 Maintenance
- Caravan: 2 Pilot, 1 Maintenance
- Denali: 2 Pilot, 1 Maintenance

PILOT INITIAL TRAINING

- Extensive hands-on Level D Full Flight Simulation training covering real-world scenarios, systems operation, abnormal procedures and environmental conditions
- Extensive classroom instruction on systems, procedures, performance and emergency operations
- Standardized methodology meeting FAA and EASA requirements

MAINTENANCE INITIAL TRAINING

- Theory-based instruction on systems, avionics, components and troubleshooting, delivered in FAA and EASA-aligned courses
- Remote learning options through FlightSafety's LiveLearning® instructor-led-platform
- Airframe, engine/APU, propeller and Engine Run & Taxi training conform to EASA objectives.
- Regular Update Training for continued technical proficiency
- Practical maintenance courses offering hands-on training and experience on specific aircraft types

DEDICATED ENTITLEMENT TRAINING COORDINATION

Textron Aviation maintains a dedicated team responsible for managing all aspects of Entitlement Training scheduling and coordination. This team works closely with you and FlightSafety to ensure pilots and maintenance technicians are prepared and fully supported with the training needed to confidently operate each new aircraft.

WHAT THIS MEANS FOR AIRCRAFT OWNERS

1. Purpose-Built Training for Textron Aviation Aircraft

- FSTAT focuses exclusively on Textron Aviation products, aligning simulators, courseware and instructors with the aircraft you fly.
- TRU Simulation™ (a Textron company) built Level D Full Flight Simulators using the latest technology in motion, feel and visuals, guaranteeing the most realistic and immersive experience.

2. Comprehensive Pilot & Maintenance Training

- Initial and recurrent pilot training
- Maintenance technician training across multiple systems
- Scenario-based safety instruction
- Access to advanced full-flight simulators

3. A Global Training Network

- 12 Training Centers Worldwide
- 74 Full Flight Simulators (FFS)
- 51 Graphical Flight-Deck Simulators (GFS)
- 18 Flight Training Devices (FTDs)

4. Post Training Mentorship with ProOwnership

- Personalized mentorship for first-time owners or those transitioning between aircraft models
- Supports insurance-mandated and FAA-required IOE/SOE minimums.
- Instills confidence, proficiency and a strong operational foundation in your new aircraft.

THE RESULT: INDUSTRY-LEADING SUPPORT FOR OWNERS

Textron Aviation and FlightSafety share a leadership philosophy centered on peace of mind, training quality, customer service and continuous improvement.
